SOURCE EVALUATIONS ARE DEFINITIVE APPRAISAL OF CONTENT IS TENTATIVE

1. During the past four years a new power plant has been under construction in the southeast end of Porici (N 50-35, E 15-58) near Trutnov. The new plant is located between the railroad track and the Porici-Upice road. It is to be completed in two years. For the exact location see sketch

25X1

2. The plant's output is to be 120,000 KW. At present two boilers are in operation, helping out the old power plant which is located some 250 meters northwards.

10 MAY 1957
25X1

3. Coal for both plants, approximately 60 earloads daily, is supplied by a mine near Male Svatonovice in the Trutnov district. Although the number of miners in this mine has more than doubled since before the war - 1,300 miners as against 600 before the war - the output is considerably lower and the new power plant will probably be badly affected by this state of affairs.
